Atracones de falsos 'éxtasis'

interviú

desvela la basura que se meten los jóvenes en forma de drogas sintéticas

MUESTRA 1: MITSUBISHI

DESCRIPCIÓN: comprimido de color beige, biconvexo, 8 mm. de diámetro, 300 mg. de peso neto. Anagrama en la cara anterior de la marca de coches Mitsubishi.

COMPOSICIÓN: 90 mg. de MDMA (3,4-metilendioximetanfetamina), conocido como éxtasis.

EFEKTOS: hipertensión, anirritia, calor, disminución del cansancio, sensación de fuerza, irritabilidad, temblores y cefaleas.

Precio: 2.500 ptas.

MUESTRA 2: PENTÁGONO BLANCO

DESCRIPCIÓN: comprimido de color blanco, plano, 9 mm. de diámetro y 325 mg. de peso neto. Cara anterior con la figura de un pentágono y cara posterior ranurada.

COMPOSICIÓN: 12 mg. de arfetamina (estimulante/excitante psíntico), 2 mg. de feniletilamina (estimulante con capacidad alucinógena), 89 mg. de cafeína (estimulante del café/vasodilatador) y presencia de lactosa (azúcar).

EFEKTOS: taquicardia y bajada de tensión.

Precio: 1.500 ptas.

MUESTRA 3: TRÉBOL

DESCRIPCIÓN: comprimido de color blanco, plano, 10 mm. de diámetro y 250 mg. de peso neto. Cara anterior con un trébol troquelado y cara posterior lisa.

COMPOSICIÓN: Quinina (antipaludíaco).
EFEKTOS: en dosis elevadas, daños hepáticos.

Precio: 800 ptas.

MUESTRA 4: EXPEDIENTE X

DESCRIPCIÓN: comprimido de color beige, biconvexo, de 9 mm. de diámetro y 290 mg. de peso neto. Cara anterior con el troquelado X Files.

COMPOSICIÓN: 29 mg. de arfetamina, 49 mg. de cafeína y presencia de sorbitol (azúcar).
EFEKTOS: excitación, pero escasa.

Precio: 1.500 ptas.

MUESTRA 5: TAPÓN BLANCO

DESCRIPCIÓN: comprimido de color blanco, biconvexo, de 8 mm. de diámetro y 250 mg. de peso neto. Liso por las dos caras.

COMPOSICIÓN: 5,5 mg. de arfetamina, 19 mg. de feniletilamina, 37,5 mg. de cafeína y presencia de lactosa (azúcar).
EFEKTOS: excitación, en dosis elevadas, posibles alucinaciones.

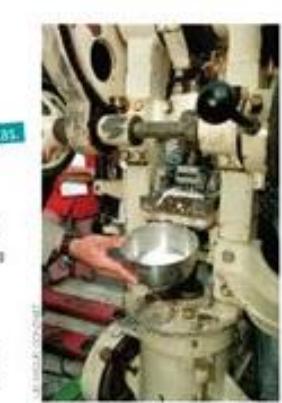

Precio: 1.000 ptas.

MUESTRA 6: MEDIA PASTI

DESCRIPCIÓN: fragmento de comprimido de color beige, biconvexo, de 11 mm. de diámetro y 370 mg. de peso neto. Presenta en su cara anterior la figura alien, y la cara posterior es ranurada.

COMPOSICIÓN: 2 mg. de atropina (antídoto para intoxicaciones de gases de guerra), 126 mg. de cafeína y presencia de sorbitol (azúcar).
EFEKTOS: en dosis elevadas, dificultad en la visión, sequedad, vértigo, mareos y taquicardias.

Precio: 1.000 ptas.

En Móstoles (Madrid), la Policía decomisó a un clan familiar esta máquina, capaz de producir 8.000 dosis de 'éxtasis' en una hora.

Resultados del análisis realizado por el Instituto Nacional de Toxicología el pasado 7 de julio por encargo de intervíu y con la colaboración de la Agencia Antidroga de Madrid.

Recent Paramethoxyamphetamine Deaths

Heather E. Felgate, Peter D. Felgate, Ross A. James, D. Noel Sims, and Dominic C. Vozzo

Forensic Science, 21 Divett Place, Adelaide, South Australia 5000, Australia

Abstract

Paramethoxyamphetamine (PMA) is a methoxylated phenethylamine derivative that has been used illicitly in Australia since late 1994. It is purportedly sold under the guise of "ecstasy", which is the colloquial name for methylenedioxymethamphetamine (MDMA). Methods for extraction, identification, and quantitation are presented. Toxicology findings in six fatalities involving the drug are discussed. Femoral blood PMA levels ranged from 0.24 to 1.8 mg/L (range 0.2–2.3 mg/L). PMA levels ranged from 1.4 to

Case Histories

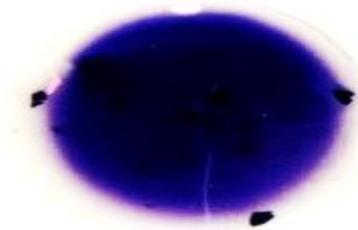

Case 1

A 31-year-old male was found dead at a party. It was said he had ingested at least five ecstasy tablets and snorted a "line" of amphetamine over a period of 5 1/2 h. He was delirious and thrashing about. Witnesses tried to cool him down and revive him with water. Clad only in shorts, he suffered from hyperthermia and had a core body temperature of 41.2°C 3 h after death with rigor mortis fully established in all limbs. Symmetrical brush abrasions were present over his fore-

A photograph of a man in a red shirt working at a complex control desk in a dimly lit room. The room is filled with colorful stage lights, including red, blue, and purple spotlights. In the background, there's a large screen displaying a grid of colors and a small model building. The man is focused on his work at the desk, which has multiple monitors and equipment. The overall atmosphere is that of a professional lighting or sound booth.

MASS MEDIA WARNINGS

A large iceberg is shown floating in the ocean. Most of the iceberg is submerged below the water's surface, represented by a dark blue gradient. A small portion of the white, textured ice is visible above the waterline. A black arrow points from the text "Visible Web" towards the top of the iceberg. A yellow arrow points from the text "Deep Web" towards the submerged base of the iceberg.
