Grafici RADAR: slide 2-21

Grafici a BARRE: slide 22-41

# Attuazione degli obiettivi del PAN nelle Regioni e P.A.

# Grado di attuazione degli obiettivi del PAN: i valori osservati

---

In ogni Regione e P.A. l'analisi è stata condotta per ciascuna delle seguenti aree:

1. Prevenzione	2. Cura e Prevenzione delle patologie correlate
3. Riabilitazione e reinserimento sociale e lavorativo	4. Monitoraggio e valutazione

Nei grafici radar viene rappresentato il punteggio assegnato a ciascun obiettivo:

1: non rilevato (livello prossimo all'origine)

2: presenza delle finalità

3: attività di progetto

4: attività routine (livello corrispondente alla circonferenza più esterna)

*Regione Emilia Romagna e Regione Toscana: valori non definiti*

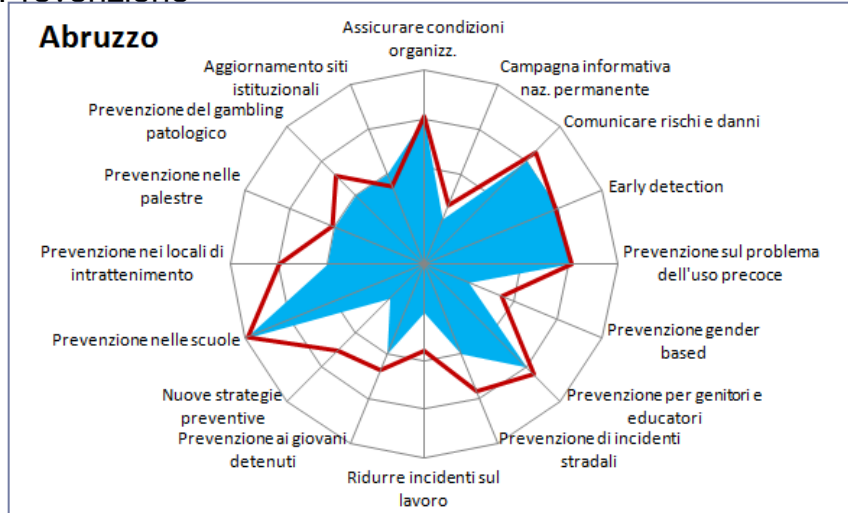

In rosso è riportata la media nazionale ottenuta calcolando per ciascun obiettivo la media aritmetica dei punteggi ottenuti nelle Regione e P.A.

# Grado di attuazione degli obiettivi del PAN: le distanze dalla media nazionale

In ogni Regione e P.A. l'analisi è stata condotta per ciascuna delle seguenti aree:

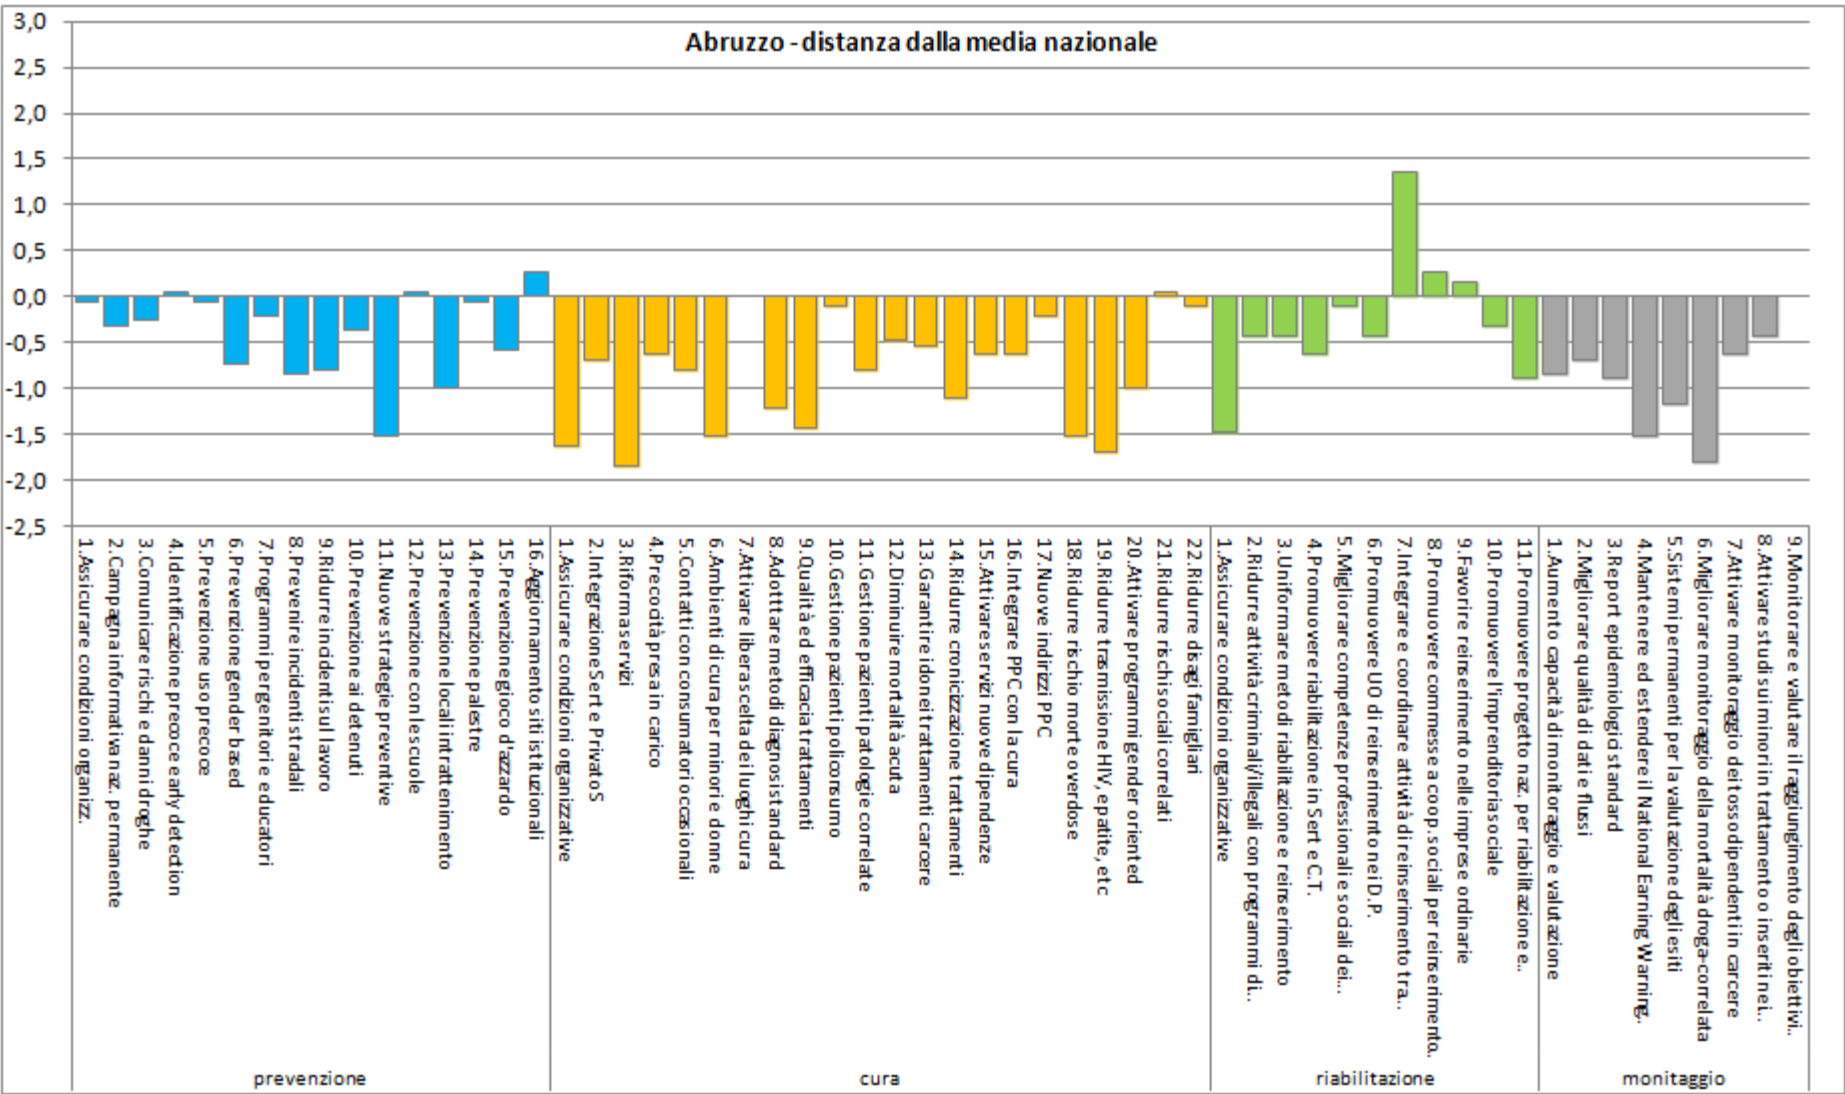

1. Prevenzione	2. Cura e Prevenzione delle patologie correlate
3. Riabilitazione e reinserimento sociale e lavorativo	4. Monitoraggio e valutazione

Nei grafici a barre, per ciascun obiettivo, viene rappresentata la distanza tra il punteggio ottenuto dalla Regione o P.A. analizzata e la media nazionale.

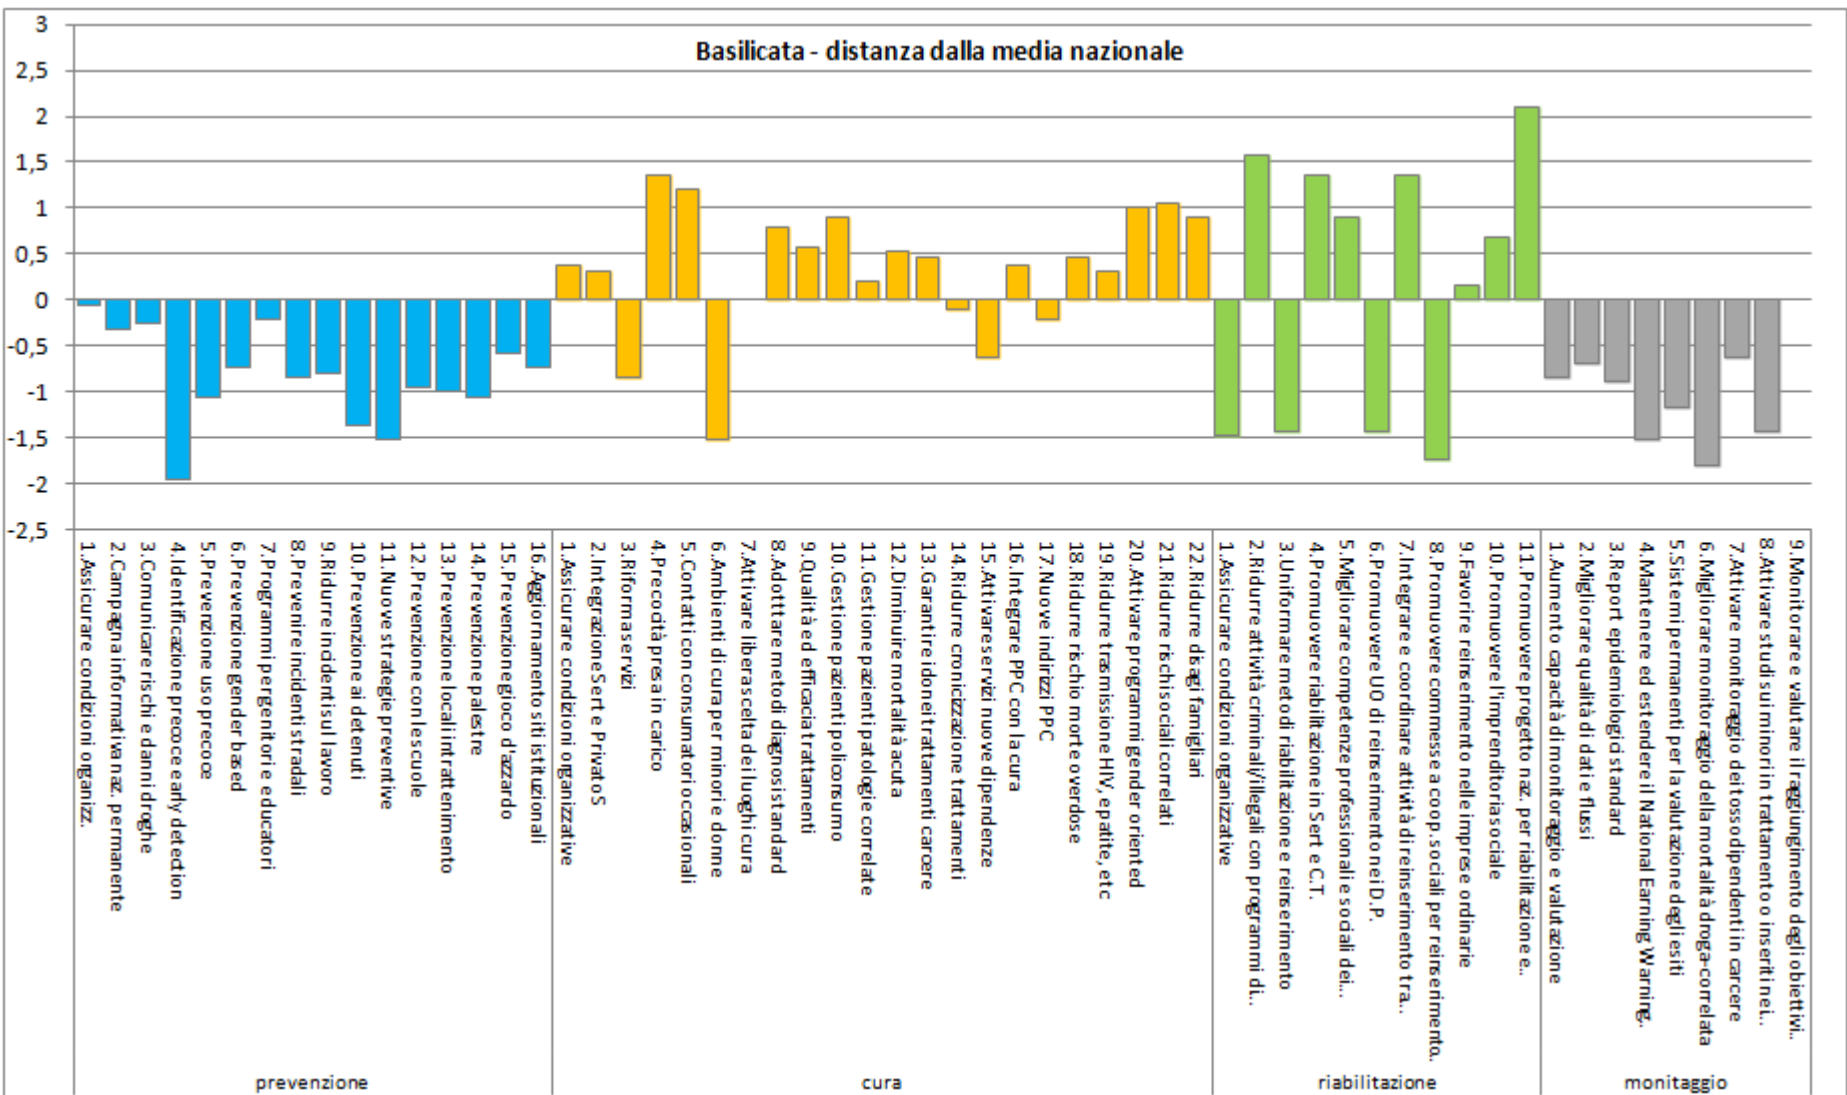

- Le barre assumono valori positivi (maggiori di 0) quando il grado di attuazione nel territorio indagato supera quello medio nazionale;
- Le barre assumono valore nullo (pari a 0) quando il grado di attuazione nel territorio indagato corrisponde esattamente alla media nazionale;
- Le barre assumono valore negativo (inferiore a 0) quando il grado di attuazione nel territorio indagato risulta inferiore a quello medio nazionale.
